

San Bernardino County Flood Control District
AERIAL PHOTOS REQUEST FORM

The Flood Control District periodically purchases aerial photo flights of portions of San Bernardino County in various formats and scales specifically for the District's own use and purposes. In recent years, public inquiries and requests for copies of District aerial photos have created a demand to make aerial photo data available to the public. Since the District's aerial photo files are intended for District use and are not flown as a public service, it was necessary for the Board of Supervisors to set a service charge to cover the District's expense to make aerial photo files available to the public. Section 7, Subsection 16.0212 of the County Code (Ordinance No. 3820) requires a service charge, to provide aerial photo access and assistance.
